Projects

Ecommerce - Inkdera.com

Dynamic online ecommerce site for a local high traffic clothing brand which also has the capability of hosting their own blog on site as well with an integrated Email marketing campaign, seo optimized and great for all screen sizes.

Technologies: GatsbyJs, GraphQL, Bootstrap, Mailchimp, Snipcart.

Blog - jrdevsblog.com

Integrated online blog with capability of housing multiple contributors, the ability to search for blog posts based on the "tags" which are associated with each post. SEO and mobile friendly. Comment section for each post.

Technologies: GatsbyJs, GraphQL, Bootstrap, Mailchimp, Disqus.

Brochure site - mandosperformance.com

Single page brochure website with a sleek design meant to catch your attention but still be simple and minimal enough for anyone to understand, custom javascript code to detect your device of choice and automatically route to their location with your native map app defaults to google map for browsers.

Technologies: Html5, Css3, Javascript, Animate on scroll library

Weather app - bbrownweather.netlify.app

Weather app utilizing local storage and the open map weather api so you can always be up to date with what the weather is looking like in your area. Great on all screen sizes with a clean minimal UI that is appealing while still giving you all the necessary information.

Technologies: Html5, Css3, javascript, Api's, Local storage.

Dad Jokes PWA - <https://dadjokessonthego.netlify.app>

Dynamic progressive web application has capability to be downloaded like a native mobile application can also run as a web application optimized for all screen sizes.

Technologies: GatsbyJs, Axios, Api
